PROFILE

I'm a developer who loves building both the front-end and back-end of web applications. I'm comfortable turning ideas into interactive websites using HTML, CSS, JavaScript, and React.js. On the back-end, I work with Python and Django to create powerful and scalable systems. I also know my way around SQL for handling databases. Always excited to learn and take on new challenges, I aim to bring fresh, practical solutions to every project.

PROJECTS

Ecommerce Web Application   2024-2025
